MAGELLAN GLOBAL OPPORTUNITIES FUND - CLASS A UNITS I APIR: MGE5500AU

AS AT 31 JANUARY 2025

PORTFOLIO MANAGER

ALAN PULLEN

INVESTMENT PHILOSOPHY

To invest in outstanding companies at attractive prices, while exercising a deep understanding of the macroeconomic environment to manage investment risk.

OBJECTIVE

To outperform the MSCI World Net Total Return Index (AUD) net of fees over periods of three years or longer.

PORTFOLIO CONSTRUCTION

A portfolio of 20-40 which we believe can achieve sufficient diversification to ensure the Fund is not overly correlated to a single company, or to industry specific or macroeconomic risks. The Fund aims to invest in companies that have sustainable competitive advantages which translate into returns on capital in excess of their cost of capital for a sustained period of time.

Cash and cash equivalents exposure between 0 - 5%.

INVESTMENT RISKS

All investments carry risk, returns are not guaranteed and there is a risk that investors may lose money on any investment they make. The Fund's Product Disclosure Statement (PDS) sets out the significant risks relevant to the Fund. You can view the PDS at www.magellangroup.com.au.

MONTHLY SUMMARY

For global equities, 2025 got off to a solid start, with the MSCI World Index up 3.5% in USD and 2.8% in AUD. The moves reflected generally solid economic data over the month; in the US, the job market remained healthy with payrolls growing by a larger-than-expected 256k and the jobless rate falling a notch to 4.1%. Annual inflation, as measured by the PCE deflator, held steady at 2.6% and the Federal Reserve held rates steady. Equity markets also defied greater policy uncertainty following the inauguration of President Donald Trump and volatility in the share prices of some AI and semiconductor companies following claims that Chinese-developed AI model DeepSeek matched the performance of much more expensive Western models.

The portfolio performed strongly for the month. Key contributors included Meta, Lloyds Banking Group and Amazon. Meta delivered another strong result underpinned by strong advertising growth, with management upbeat on many AI-powered strategic initiatives to drive future revenue growth. Detractors included Dollar General, Booking Holdings and Ulta Beauty. There was limited portfolio activity in the month, reflecting a consistent view of the high quality and acceptable valuation of portfolio holdings. Nonetheless, we continue to judge the valuation of the overall market as full and remain vigilant to possible downside risks.

Index movements and stock contributors/detractors are based in local currency terms unless stated otherwise.

⁵ Sectors are internally defined. Geographical exposure is calculated on a look through basis based on underlying revenue exposure of individual companies held within the portfolio. Exposures may not sum to 100% due to rounding.

⁶ Shows how much the stock has contributed to the fund's gross return for the period in AUD. Excludes non-disclosed positions established in the latest quarter.
