INVESTMENT PHILOSOPHY	OBJECTIVE	PORTFOLIO CONSTRUCTION	INVESTMENT RISKS
To prudently invest in outstanding infrastructure and utilities companies at attractive prices that exhibit highly predictable cashflows.	To achieve attractive risk-adjusted returns over the medium to long term; while reducing the risk of permanent capital loss.	Relatively concentrated portfolio of typically 20 to 40 investments. Typical cash and cash equivalents exposure between 0 - 10%.	All investments carry risk, returns are not guaranteed and there is a risk that investors may lose money on any investment they make. The Fund's Product Disclosure Statement (PDS) sets out the significant risks relevant to the Fund. You can view the PDS at <a href="http://www.magellangroup.com.au">www.magellangroup.com.au</a> .

## MONTHLY SUMMARY

The portfolio recorded a positive return in February as the broader market pulled back on the increasing likelihood of a trade war affecting global economies after the new US administration applied (then suspended) tariffs for key trading partners Canada and Mexico, and lifted tariffs on China – to which the Chinese responded.

The key contributors for the month were Vinci, Eversource Energy and Cellnex. Shares in France-based toll road and airport operator Vinci lifted as its full-year result beat expectations and as the minority French government passed a budget, reducing short-term political uncertainty. US electricity transmission and distribution company Eversource rallied as the legislature in Connecticut, the state that represents around 30% of the company's assets, moved to improve the transparency and increase the number of board members of the State's regulator, diluting the impact of the adversarial regulatory commission Chair. Cellnex, Europe's largest independent operator of wireless telecommunications infrastructure, lifted as results exceeded expectations and it announced a share buyback.

The key detractors for the month were Sempra Energy, Groupe ADP and United Utilities. US-based utility Sempra declined as management announced a guidance cut to FY25 expectations, which predominantly reflected the near-term impact of regulatory earnings lag in their Texas jurisdiction. French airport operator ADP fell despite a solid result as the company guided to higher medium-term capex than the market was expecting. UK water utility United Utilities fell due to uncertainty over whether or not a UK court would approve the Thames Water creditor plan, with rejection risking special administration for Thames. While this has no direct impact on United Utilities, it cast a pall over the sector.
