Vinva Australian Equity Fund

APIR: MGE2445AU | ARSN: 681 452 013

To Australian wholesale and retail investors

QUARTERLY REPORT | 30 JUNE 2026

INVESTMENT STRATEGY

The Fund invests substantially all of its assets in the Vinva Australian Equites Fund, (the "**Underlying Fund**"), a registered managed investment scheme managed by Vinva Investment Management Limited. The Underlying Fund, invests substantially all of its assets in Australian listed securities (or derivatives that provide exposure to Australian listed securities or indices).

OBJECTIVE

The Fund aims to outperform the S&P/ASX 300 Accumulation Index, after the Responsible Entity's fees, over periods of three years or longer.

INVESTMENT APPROACH

Vinva uses an active systematic investment approach which harvests returns from Australian listed companies using a disciplined and repeatable process. The Underlying Fund's portfolio will typically comprise over 90 investments. The Underlying Fund is managed to be style neutral and therefore not expected to be materially correlated to a single company, or to industry specific or macroeconomic risks.

INVESTMENT RISKS

All investments carry risk, returns are not guaranteed and there is a risk that investors may lose money on any investment they make. The Fund's Product Disclosure Statement (**PDS**) sets out the significant risks relevant to the Fund. You can view the PDS at www.magellaninvestmentpartners.com

FUND FACTS

MARKET REVIEW

The S&P/ASX 300 Accumulation Index returned 4.14% in the June quarter. Australian equities delivered a modest positive return over the June quarter, though the headline gain masked a significant rotation beneath the surface. The dominant macro story was the RBA's third consecutive 25-basis-point hike in May, lifting the cash rate to 4.3-5.0%, followed by a hold at the June meeting as the Board assessed the cumulative impact of tightening. Inflation remained the central preoccupation: the March quarter CPI printed at 4.6% annually with the trimmed mean at 3.3%, and the monthly indicator for May showed headline CPI at 4.0% with the trimmed mean rising to 3.6%, signalling that underlying price pressures were building even as fuel-driven headline inflation began to ease. Labour market data were mixed, with unemployment rising to 4.5% in April, above market expectations of 4.3%, before partially recovering to 4.4% in May. The broader data sweep pointed to mounting household strain, with Westpac consumer sentiment weakening, NAB business conditions easing, CoreLogic dwelling values stalling nationally in May after Sydney and Melbourne recorded outright declines, with auction clearance rates tracking below average and building approvals falling for a third consecutive month.

The commodity complex drove the most significant sector-level divergence of the quarter. Crude oil retreated sharply in the quarter as Middle East ceasefire expectations firmed, ultimately falling over 30% during the quarter and dragging energy stocks materially lower. Gold, which had been a key market leader over the prior year, corrected lower in Q2 as rising global yields and a stronger US dollar weighed on bullion. Iron ore held broadly firm through April and May before softening in June, with Chinese demand headwinds and rising port inventories capping upside. Resources as a whole detracted from market returns over the quarter. Consumer discretionary stocks outperformed as markets priced a pause in the tightening cycle following the softer CPI and labour prints. The AI-enabler theme was a clear thread throughout the quarter, with capital goods and select small cap technology names also outperforming as investors sought domestic proxies for global data-centre and infrastructure capex.

Consumer Discretionary (+18.0%) was the best-performing sector over the quarter, led by Aristocrat Leisure (+36.5%) and Wesfarmers (+23.9%), while Energy (-16.7%), dragged down by Woodside Energy (-19.5%) and Whitehaven Coal (-17.5%), underperformed the broader market. At a stock level, the best performers included Pro Medicus (+74.0%), James Hardie Industries (+46.3%) and Life360 (+42.2%) while Cochlear (-28.0%), The A2 Milk Company (-21.8%) and Ramelius Resources (-20.4%) were amongst the biggest laggards.

FUND REVIEW

The Fund had a positive alpha quarter, outperforming the benchmark by 0.1% (net of fees). As the Fund invests the bulk of its assets in the Vinva Australian Equities Fund (Underlying Fund), the commentary below is provided in relation to the investments held by the Underlying Fund.

Quality and valuation signals were the largest detractors from alpha over the quarter, partially offset by behavioural and sentiment signals. Stock-specific performance was positive during the quarter.

The biggest stock contributors to performance included overweight positions in Aristocrat Leisure (ALL) (+32bps) and Macquarie Group (MQG) (+20bps). Aristocrat stock rose strongly over the quarter after its H1 FY2026 results, released on 13 May, delivered a double-digit earnings-per-share beat driven by record North American gaming operations growth and an expanded share buyback program, sustaining strong upward momentum through to the end of the quarter. The overweight position in ALL is driven by a combination of behavioural, sentiment, quality and short-horizon signals. MQG stock rose strongly over the quarter after reporting FY26 results that showed a record second-half profit driven by surging Commodities and Global Markets earnings and major asset sale gains, pushing its share price to an all-time high. The overweight position in MQG is driven most significantly by our behavioural and sentiment signals.

An underweight position in Wesfarmers (WES) (-20bps) detracted from performance during the quarter. The stock rose strongly over Q2 after its 10 June Strategy Briefing Day where management detailed accelerated AI adoption across Bunnings and Kmart, concrete plans to grow Bunnings' addressable market, and Kmart's ambition to double its business, driving a sharp re-rating of the group's long-term earnings outlook. The underweight position in WES is driven by a combination of behavioural, sentiment, tactical and value signals.

Stock contributors/detractors are based in local currency terms unless stated otherwise.
