INVESTMENT STRATEGY	OBJECTIVE	INVESTMENT APPROACH	INVESTMENT RISKS
The Fund invests substantially all of its assets in the Vinva International Alpha Extension Fund, (the “Underlying Fund”), which is a registered managed investment scheme managed by Vinva Investment Management Limited. The Underlying Fund's portfolio will typically comprise over 400 long positions and over 80 short positions with a gross exposure of up to 140% of the Underlying Fund's NAV.	The investment objective of the Fund is to outperform the return of the MSCI World ex Australia ex Tobacco ex Controversial Weapons Index (AUD) with net dividends reinvested, after the Responsible Entity's fees, over periods of three years or longer.	Vinva uses an active systematic approach which harvests returns from global listed companies using a disciplined and repeatable process. The Underlying Fund's portfolio is typically expected to have exposure to 400-600 positions and will also have some exposure to cash and cash equivalents. The Underlying Fund's investments in global markets will typically be unhedged.	All investments carry risk, returns are not guaranteed and there is a risk that investors may lose money on any investment they make. The Fund's Product Disclosure Statement (PDS) sets out the significant risks relevant to the Fund. You can view the PDS at www.magellangroup.com.au .
